

The Napa County Transportation and Planning Agency's (NCTPA) Shared Vehicle program was created expressly for 501(c)(3) organizations that serve the elderly and/or disabled.

To qualify for this program you must be:

A non profit, public, or any other 501(c)(3) organization that provide services for the elderly and/or disabled.

Here is how it works

You Provide the Driver (and the gas)

- Once your organization or agency qualifies for this program, you must identify a prospective driver from your agency. Driver must be under your agency's workers' compensation policy).
- It is highly encouraged for the designated driver to have a Class B driver license.
- The borrowing agency will need insurance for general liability and insurance for hired & non-owned auto liability. NCTPA must be added in the insurances as an additional insured.

We Provide the Vehicle and train the driver too!

- NCTPA will perform a background check and drug testing on the assigned driver. NCTPA will also ask for proof that the candidate is covered under that agency's workers compensation insurance.
- If the assigned driver passes all the requirements above, NCTPA will provide training to the driver and add them onto our vehicle insurance.
- NCTPA will also maintain the vehicles.

After the assigned driver has been trained, you can schedule time to borrow a vehicle. The organization applying is in charge of picking up and returning the vehicle, submitting trip paperwork, and replacing the gasoline used. Most vehicles require a Class B driver license.
